

## Why get credentialed?

- A credential raises your credibility with your employer, community, and colleagues
- Credentialed individuals frequently receive increased pay and opportunities for promotions
- It shows dedication to the environmental health field
- Provides a commitment to staying current with the ever changing environmental health policies, regulations, and practices that affect the profession by requiring continuing education
- Impartial, third-party endorsement of an individual's professional knowledge and experience that serves as verification that you have achieved a baseline level of competency in your subject area
- Distinguishes you from others in your field
- Raises the visibility of the environmental health profession
- Demonstrates to your community that you are competent, properly trained, and equipped to carry out your duties

## A Professional Credential from NEHA

Since 1937, NEHA has been leading the way for practitioners to achieve a set of defined competencies, evidenced through testing and maintained through continuing education. NEHA's long-

*A credential helps one to prove competency and capability in a given field*

standing history in credentialing means that our standards are high and that over 6,100 individuals with a NEHA credential have mastered a body of knowledge and acquired practical experience to perform relevant work responsibilities.

### ● **Registered Environmental Health Specialist/Registered Sanitarian (REHS/RS)**
